Statement 1	Statement 2
Correct	Correct
It is under the Ministry of Agriculture and Farmers' Welfare.	CHAMAN (Coordinated programme on Horticulture Assessment and Management using geo informatics) · It was launched to use geo-spatial applications for the assessment and management of horticultural crops · Under the project, the remote sensing technology and sample survey techniques is used for production forecasting of major horticultural crops in select districts. · Other components include geospatial applications for horticultural development and management planning (site suitability, post-harvest infrastructure, crop intensification, GIS database creation, orchard rejuvenation, aqua-horticulture).

4. Correct Answer: C

Explanation

Solution (c)

Bugyals

- Bugyals are alpine pasture lands, or meadows, in higher elevation range between 3,300 metres (10,800 ft) and 4,000 meters (13,000 ft) of the Himalayas in the Indian state of Uttarakhand, where they are called "nature's own gardens".
- The topography of the terrain is either flat or sloped.
- The surface of these bugyals is covered with natural green grass and seasonal flowers.
- They are used by tribal herdsmen to graze their cattle.
- During the winter season the alpine meadows remain snow-covered.
- During summer months, the Bugyals present a riot of beautiful flowers and grass.
- As bugyals constitute very fragile ecosystems, particular attention needs to be given for their conservation.
