

IASBABA TEST 16 ENVI AND ST

24. Consider the following statements regarding 'Penguins':

1. Penguins who are cold blooded in nature, have a layer of fat under their skin called "blubber".
2. Penguins rub oil from a gland onto their feathers to help make them waterproof and windproof.

Choose the **incorrect** statement/s using the codes given below

- a) 1 only b) 2 only c) Both 1 and 2 d) Neither 1 nor 2

25. Consider the following statements regarding the species diversity and biodiversity:

1. A species with lesser genetic diversity has higher chances of adapting itself to environment.
2. An ecosystem with higher bio-diversity has higher chances of adapting itself to environment.

Choose the correct statement/s from the following codes:

- a) 1 only b) 2 only c) Both 1 and 2 d) Neither 1 nor 2

26. Consider the following schedules under the 'Wildlife Protection of Life' Act 1972

1. Schedule I 2. Schedule II 3. Schedule III 4. Schedule IV
5. Schedule V 6. Schedule VI

Poaching, smuggling and illegal trade of animals listed under _____ are prohibited.

- a) 1 and 2 only b) 1, 2 and 5 only c) 1, 2 and 6 only d) 1, 2, 3 and 4 only

27. Consider the following species:

1. Lion tailed macaque 2. Rhinoceros 3. Black buck 4. King cobra

Which of the above species are listed under the Schedule I of the Wild life Protection Act 1972?

- a) 1, 2 and 3 only b) 2, 3 and 4 only c) 1, 3 and 4 only d) 1, 2 and 4 only

28. Consider the following species:

1. Mice 2. Flying Fox 3. Common crow 4. Rat

Which of the above species are considered as 'Vermin' under the Wild life Protection Act 1972?

- a) 1, 2 and 3 only b) 2, 3 and 4 only c) 1, 3 and 4 only d) All of the above

29. Which Schedule of the Wildlife Protection Act 1972 lists Plant species?

- a) Schedule III b) Schedule IV c) Schedule V d) Schedule VI

30. Consider the following statements regarding 'Red Panda':

1. It is endemic to the North-east India, and found no-where else in the world.
2. It is considered 'Critically Endangered' specie.
3. Habitat destruction is one of the major threats to its population.

Choose the correct statements using the codes given below

- a) 1 and 2 only b) 2 and 3 only c) 3 only d) All of the above

31. Consider the following features:

1. It is the world's smallest wild mammal.
2. Its scientific name is 'Porcula salvania'.
3. It is now restricted to the Manas Wildlife Sanctuary and its buffer reserves.

Which animal species is being spoken about in the above lines?

- a) Kondana Rat b) Pygmy Hog c) The Namdapha Flying Squirrel d) Elvira Rat

32. Consider the following statements:

1. Frogs and Toads are exclusively carnivorous in their eating habits.
2. Penguins are very adaptable to both freshwater and saltwater environments.

Choose the correct statement/s using the codes given below

- a) 1 only b) 2 only c) Both 1 and 2 d) Neither 1 nor 2

33. Why is the biological diversity more in Tropical latitudes as compared to Temperate latitudes?

1. Tropical environments are more seasonal and relatively constant and unpredictable.
2. Solar energy is more in Tropical latitudes.
3. Tropical latitudes have remained relatively undisturbed for millions of years.

Choose the correct statement/s

- a) 1 and 2 b) 2 and 3 c) 1 and 3 d) All of the above

34. Which of the following statements about 'Monotremes' is incorrect?

- a) There are only five living species of monotremes found on the planet.
- b) They are a subdivision of 'Mammals', but display few characteristics of reptiles.
- c) All of them are found in Australia and New Guinea.
- d) They have a pouch to carry their young ones.
