

## IASBABA TEST 3 GEOGRAPHY

**63. Which of the given below are landforms of 'Wind Erosion' in deserts?**

- a) Dunes                      b) Ventifacts or dreikanter                      c) Barchans                      d) Loess

**64. Consider the following statements regarding the 'Continental Shelves':**

1. These are extended margins of oceanic crust.
2. There is uniformity in the width of continental shelves in every ocean.
3. The sedimentary deposits found here are sources of fossil fuels.

Which of the above statement is/are incorrect?

- a) 1 only                      b) 1 and 2 only                      c) 2 and 3 only                      d) All of the above

**65. Arrange the following ocean relief features in the correct sequence of occurrence from land to ocean basin:**

- a) Abyssal Plain-Continental Shelf- Continental Rise-Continental Slope
- b) Continental Shelf-Continental Slope- Continental Rise-Abyssal Plain
- c) Continental Shelf-Continental Rise- Continental Slope-Abyssal Plain
- d) Continental Shelf-Abyssal Plain- Continental Slope-Continental Rise

**66. Which of the below given processes are part of 'Tectonism'?**

1. Orogenic processes                      2. Earthquakes                      3. Volcanism                      4. Denudation                      5. Plate tectonics

Choose correct option from below:

- a) 1 and 2 only                      b) 1, 3 and 4 only                      c) 1, 2, 3 and 5 only                      d) All of the above.

**67. Consider the following statements:**

1. Temperature and precipitation are two important climatic elements that control various exogenic processes
2. All exogenic geomorphic processes are covered under the general name of denudation

Which of the above statement is/are incorrect?

- a) 1 only                      b) 2 only                      c) Both 1 and 2                      d) Neither 1 nor 2

**68. Rivers create different landforms in their different stages of lifecycle. In this context, consider the following:**

1. Youth stage: V shaped valleys, Rapids                      2. Mature stage: floodplains
3. Old stage: swamps and marshes

Which of the above is/are correctly matched?

- a) 1 only                      b) 1 and 2 only                      c) 2 and 3 only                      d) All of the above

**69. Consider the following statements about 'Continental Slope':**

1. It connects the continental shelf and ocean basins
2. Gradient of the slope is less than 1 degree
3. The slope boundary indicates the end of continents
4. Submarine Canyons are observed in this region

Which of the above statement is/are correct?

- a) 1 only                      b) 1 and 2 only                      c) 1, 3 and 4 only                      d) All of the above

**70. Consider the following pairs:**

1. Seamount: It is flat topped, show evidence of gradual subsidence
2. Submarine canyons: These are deep valleys, found cutting across continental shelves
3. Guyots: It is a mountain with pointed summits, rising from sea floor
4. Mid-oceanic ridges: Composed of two chains of mountains separated by large depression

Which of the above is/are correct?

- a) 1 and 2 only                      b) 2 and 4 only                      c) 1 and 3 only                      d) All of the above

**71. Which of the following is/are the terrigenous ocean deposits which are derived mainly from the land?**

1. Muds                      2. Oozes                      3. Red clays

Which of the above is/are correct?

- a) 1 only                      b) 1 and 3 only                      c) 2 and 3 only                      d) All of the above

**72. Which of the factors influence the origin and nature of ocean currents?**

1. Temperature                      2. Salinity                      3. Wind                      4. Coastlines

Choose correct option from below:

- a) 3 only                      b) 1 and 2 only                      c) 1, 2 and 3 only                      d) All of the above

**73. Which of the following are the useful applications of 'Tides'?**

1. Navigation                      2. Generation of electricity                      3. Desilting of sediments in estuaries

Choose correct option from below:

- a) 3 only                      b) 1 and 2 only                      c) 2 and 3 only                      d) All of the above
