### 40. Correct Answer : D

#### Answer Justification :

**Learning:** Rainforests are restricted to heavy rainfall areas of the Western Ghats (near southwestern coasts) and the island groups of Lakshadweep, Andaman and Nicobar, **upper parts of Assam, some low-lying eastern belts and Tamil Nadu coast (south-eastern coast).**

They are at their best in areas having more than 200 cm of rainfall with a short dry season. The trees reach great heights.

For the deciduous forests, given the scanty rainfall in the south-eastern rainfall, they are found predominantly across Southern Peninsular India, including the south-eastern coasts.
