in human behaviour i.e highest stds of human behaviour

Human behaviour can be categorised as good, better, best. Hence ethics can be defined as field of normative science which deals with human behaviour / character and conduct with an aim to achieve Summum Bonum

It can be alternatively also defined

(1) Ethics deals with stds of human conduct on the basis of universal principles.

(2) Evaluation of human conduct on basis of moral principles is considered ethics

(3) Ethics deals with moral philosophy

(4) Ethics is about do not do onto others as you wouldn't be done by (Mahabharat)
