

the thirst of poor.

Human has always been an innovative being. She invented fire to keep away wild animals. Invention of wheel led to faster transportation. Innovation of agriculture led to coming up of villages & innovation of steam engine led to industrial revolution.

We can use the same innovative spirit to achieve inclusive growth in India.

Today, agriculture is marred by lack of remunerative prices. Farmers are doing suicide due to crop failures. There is a lack of cold storage, warehouses leading to post-harvest losses. There is lack of comprehensive policy to increase their income.

Herein, innovation can come as an aid. Use of genetically modified seeds like Bt cotton, Bt brinjal
